Conversion of HMI screen to Panel PC

Smooth and seamless transition
with minimum disruption

Your Benefits

- Ensure continued service support
- Spare parts availability
- Preserve the value of assets
- Controls improvement

Our innovation, your advantage

The continuous focus on innovation and development at PackSys Global equips our customers with smarter solutions, to better meet their present and future needs.

We present to you upgrade from conventional HMI screens PP320 and PP420 (both obsolete) to Panel PC 2100. This combines display and PC unit into a single compact device. It offers more compact, modular, and graphically enriching interface for your machines.

All our new machines have the Panel PC 2100 displays.

We have also designed HMI panel conversion kit based on the Panel PC 2100. Our retrofit will ensure continued service support and availability of service parts.

Your investments are paid back while you continue to receive the benefits of new technology for years to come.

Our trained and qualified field engineers have performed retrofits on many PackSys Global machines, some of which have been in operation for over 30 years. We always live up to the trust you place in us.

Conversion of HMI screen to Panel PC

HMI PP320 (Obsolete)

HMI PP420 (Obsolete)

Improved features with PPC2100

- Compact design and easy wiring
- Improved user interface
- Fanless cooling leading to long usage life and high system reliability
- Projected capacitive multi-touch screen
- Anti-glare glass
- Scratch-resistant surface
- Easy to clean
- Gloved operation possible
- Easy hardware maintenance & servicing
- Possibility of remote troubleshooting

Machines that need upgrade

PP320 Conversion to PPC2100 (Only Panel)

- LT250
- LT125
- SHOT

PP320 Conversion to PPC2100 (Only Panel)

- LMS
- LTR
