

Conversion to Panel XV363 Series

Designed to be glove-friendly

Your Benefits

- Display is glove-operable, allowing for easy and effortless use
- Available in a variety of display sizes, such as 5.7" and 12", giving you the flexibility to select the one that best suits your needs
- Our equipment features a robust infrared touch, a color TFT display, and laminated safety glass that guarantees durability and hazard-free operation
- Anti-reflective display surface provides uninterrupted use and is perfect for any lighting condition, ensuring a seamless user experience
- Built with IP65 protection on the front panel, making it ideal for harsh industrial environments
- Maintenance-free and ready for remote assistance

The panel XVS-440 has been on the market for a long time. The availability of electronic components used in the various modules of this system is no longer secured, and therefore the maker has announced the discontinuation of this system.

We at PackSys Global always strive to give our customers a smooth and seamless transition in such situations to ensure minimum disruption and impact. We have created a retrofit kit for a seamless conversion to XV363 panel series.

Get the most out of your machine with our complete conversion kit, including the XV-363 visualization unit which offers a glove friendly operation.

With our kit, you'll receive a completely compatible device for a direct exchange, allowing for a hassle-free upgrade process. The kit is designed to improve the efficiency and productivity of your machine, giving it a new lease on life.

Don't settle for outdated equipment - upgrade to our complete conversion kit with the XV363 panel and experience the benefits of a modern, user-friendly interface. Contact us today to learn more and start your machine's transformation.

PSS / 2023 / MAY / EN

We provide all the necessary components in a single package, and our installation instructions are designed to make the process easy for your technicians. With just a few simple steps, your technician can install the mechanical components and get your system up and running quickly.

System consists of

- Operating panel XV363
- Electronic and mechanical incidentals
- Software package
- Documentation
