

HPL/HPX

Fix and press system for unrivaled tube quality.

- 150 tubes/minutes guaranteed up to diameter 63.5 mm
- Quick size part changeover: just 10 minutes
- Self-centering size parts

Experience shows that retooling for a new order can take hours of valuable production time. But no more: our HPL and HPX headers reduce changeover time to as low as ten minutes and the changeover does not require any hand tools. A unique feature of these machines is that after changing size parts no operation adjustments, nor tube length settings, are required. The 90 tpm HPL can be upgraded to the 150 tpm HPX when you need it simply by adding more tooling.

Technical data

	HPL	HPX
Tube diameter	19 – 63.5 mm	19 – 63.5 mm
Tube length	60 – 240 mm	60 – 240 mm
Speed	90 tpm	150 tpm
Oval tubes possible	Yes	Yes
Recommended for	Cosmetic	Cosmetic

The HPL and HPX headers are flexible enough to handle any of the following options:

- Straight line or 90° line operation
- Tube orientation
- Oval tubes
- Remote maintenance
