

MBNET

Remote Access Router

Your Benefits

- Take control of your remote access with MBNET's secure VPN router. Our Controlled Remote Access feature allows you to decide when the router connects to the portal to access the components behind it.
- Your security is our top priority. That's why every hardware device leaving our factory comes with its own unique password, ensuring unparalleled protection against unauthorized access.
- Stay informed about active remote sessions with our warning system. By using a digital output, you can activate a local alarm or visual alert to notify onsite personnel when a remote session is active.

Beyond security, MBNET provides several production benefits, such as:

- MBNET offers fast access to customer support, live monitoring, online setup, multiple connections, remote support, and direct panel control.

Are you tired of waiting for hours on the phone for technical support?

With MBNET's secure VPN Router, you can get fast and reliable remote support from our customer service experts. Our VPN Router provides a secure and encrypted connection, ensuring your privacy and protection against cyber threats.

Simply connect your machine to our VPN Router and access our online customer support portal to get instant assistance. No more waiting in long queues or dealing with complicated technical issues on your own.

MBNET enables fast and hassle-free remote support. Get your machine ready today with our secure VPN Router.

Requirements

We provide all the necessary components in a single package, and our installation instructions are designed to make the process easy for your technicians. With just a few simple steps, your technician can install the components and get your system up and running quickly.

We offer the option to set up the interface with our dedicated service and software department, should you require any assistance.

System consists of

- MBNET Router with Electronic and mechanical incidentals
- Ethernet connection cable
- Documentation and Installation instructions

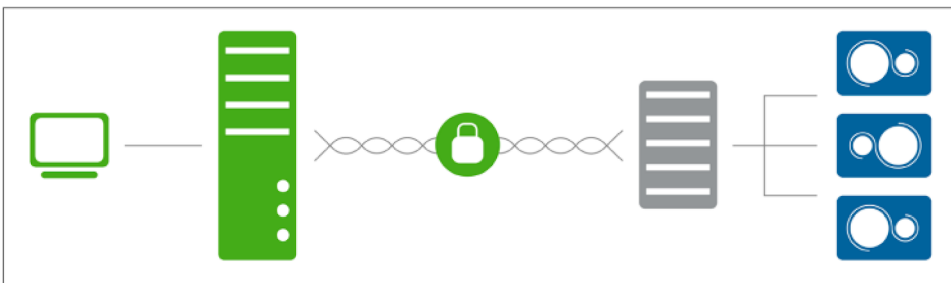

Available for machines

No matter what type of machine you have, MBNET's secure VPN router can be configured to provide remote support and assistance.

Contact us today to learn more about our remote support solution and how it can benefit your specific machine.
