

# Oral care and pharmaceutical tube lines

Marriage of cost and output.

---

These laminate tube lines are the culmination of the latest technical developments from PackSys Global. They have been designed in accordance with the laminate tube user's requirements in terms of cost per output, performance, and required options.

The Focus 80 produces 250 tubes/minute and has become the standard line for oral care tube manufacturers. For a wider range of diameter options the Focus 40 is more appropriate, producing 125 tubes/minute. In exceptional cases where a large annual volume of tubes is required, the SHOT line, producing 500 tubes per minute, may be the best solution.

- Optimized cost per output
- High efficiency
- Compact design

## Technical data

	<b>Focus 40</b>	<b>Focus 80</b>	<b>SHOT</b>
<b>Tube diameter</b>	16 – 50 mm	19 – 40 mm	16 – 38 mm
<b>Tube length</b>	80 – 200 mm	80 – 200 mm	80 – 200 mm
<b>Speed up to</b>	125 tpm	250 tpm	500 tpm
<b>Cap orientation</b>	Yes	Yes	No
<b>Splice table</b>	Semi-automatic	Automatic	Automatic
